

Abstract

The cosmetic or dermatological preparation comprises

- 5 (I) up to 12% by weight, based on the total weight of the preparations, of one or more C₁₂-C₄₀ fatty acids,
 - (II) 0 to a maximum of 1% by weight, based on the total weight of the preparations, of one or more C₁₂-C₄₀ fatty alcohols
 - (III) 0.01 to 10% by weight, based on the total weight of the preparations, of amphiphilic polymers and/or associative polymers and/or siloxane elastomers,
 - 10 (IV) sodium hydroxide solution and
 - (VII) 0.1 to 30% by weight of pigments and/or dyes
 - or
 - (I) a maximum of 10% by weight %, based on the total weight of the preparations, of one or more C₁₂-C₄₀ fatty acids,
 - 15 (II) 0.1 to 10% by weight %, based on the total weight of the preparations, of one or more C₁₂-C₄₀ fatty alcohols,
 - (III) 0.01 to 10% by weight, based on the total weight of the preparations, of amphiphilic polymers and/or associative polymers and/or siloxane elastomers,
 - (IV) sodium hydroxide solution and
 - 20 (V) up to 10% by weight, based on the total weight of the preparations, of C₁₂-C₄₀ polyethoxylated (POE) fatty acid esters with a POE chain length of 10-100 and
 - (VI) optionally low molecular weight surfactants and
 - (VII) 0.1 to 30% by weight of pigments and/or dyes.
- 25 The preparation has an optically pleasing pearlescence, is storage-stable and extremely skin-compatible.
